AAREB KHAN

MERN STACK DEVELOPER / DATA ANALYST / AI ENGINEER

aarebkhan02@gmail.com
Bhopal, M.P, India
9131136941
Portfolio · GitHub · LinkedIn

Full Stack Web Developer, Data Analyst, and AI Engineer pursuing a BTech in Computer Science and Engineering. Experienced in building responsive and user-focused web applications with authentication, API integration, database management, and dynamic interfaces. Skilled in developing AI solutions using RAG, semantic search, vector databases, and context-based question answering. Strong problem-solving mindset with a focus on building practical, efficient, and scalable solutions. Experienced in working with datasets to analyze trends, generate insights, and support data-driven decision-making. Passionate about learning emerging technologies and transforming ideas into reliable, real-world applications.

Experience

Software Development Intern • Ethical Intelligence
- Participated in development of an e-commerce application for a client.
- Gained hands-on experience in frontend development, working on responsive UI components and integrating APIs for dynamic data rendering.

Education

All Saints' College | Rgpv University, Bhopal, India | Bachelor of Technology, CSE '24 – Present
All Saints' School | Gandhi Nagar Bhopal, Bhopal, India | Senior Secondary Education | Percentage: 75% '12 – '24

Skills

Web Development: HTML, CSS, JavaScript, React.js, Tailwind.css, Node.js, Express.js, MongoDB, MySQL
Data Analysis: Python, NumPy, Pandas, Matplotlib, Seaborn
Machine Learning: Supervised Learning, Unsupervised Learning, Scikit-Learn, Pickle, Joblib
Deep Learning: ANN, CNN, RNN, LSTM, Transformers, Tensorflow, Keras
Computer vision: Image Classification, Object Detection, OpenCV, ResNet50, VGG16, InceptionNet, AlexNet, YOLO
Natural language processing: BERT, BART, GPT, TF-IDF, CBOW, Word2Vec, Named Entity Recognition (NER), Text Processing, NLTK
Generative AI: HuggingFace, Groq, Gemini, Langchain, RAG (Retrieval-Augmented Generation)
Tools & Deployment: Git-Github, FastAPI, Streamlit, Hugging Face, Netlify, Vercel

Projects

Real World Projects

MHS (Modest Hijab Store) | Link
- Built and deployed a functional e-commerce frontend with React.js, Vite, and Tailwind CSS.
- Implemented product filtering, dynamic routing, and cart management through APIs.
- Focused on scalability, performance, and a responsive UI for real-world use.

Educational Projects

Thetidhkar | Link
- Developed a responsive, elegant e-commerce website for Thetidhkar, a client's handcrafted gifting business, using React.js and Tailwind CSS.
- Created an engaging shopping experience with interactive product displays, smooth animations, and a modern UI.

IMS (Incident Management System)
- Built a responsive Incident Management System in React to streamline incident tracking and management.

Netflix Data Analysis
- Analyzed Netflix viewing data with Pandas and Matplotlib to uncover viewing trends and extract insights.

Superstore Sales Analysis
- Analyzed sales and profit data to identify performance patterns and support better business decisions.

Airbnb Rental Price Prediction
- Applied regression models to predict Airbnb rental prices using a data-driven approach.

Student Performance Prediction | Link
- Trained a machine learning model on a student dataset to predict academic performance and deployed it as a web app with Streamlit.

AI Chatbot (SHAWARMAA) | Link
- Built a Groq LLM-powered chatbot in Streamlit with session memory and custom prompts.

Face Recognition System
- Implemented real-time face recognition with OpenCV and LBPH using live webcam detection.

Face Mask Detection Application | Link
- Developed and deployed a YOLO-based face mask detection model trained on a custom dataset with Streamlit.
